PROFESSIONAL SUMMARY

Motivated Frontend Developer with 2.5 years of experience. Highly adaptable with strong interpersonal skills and a proactive attitude. Results-driven, detail-oriented, and committed to continuous learning and professional growth.

Experience

Frontend Developer
2.5 Years Experience

- Developed and maintained web applications using JavaScript, React, and Redux.
- Implemented responsive designs and state management solutions to enhance user experience.
- Integrated Firebase for authentication, data storage, and real-time updates.

EDUCATION

Govt Graduate College (Kahuta, Pakistan), Intermediate

PROJECTS

JavaScript

Developed two engaging games: **Snake-Rush**, an interactive snake game featuring three rounds, game-over functionality, and customizable speed, and **Chess-Conqueror**, a chess game with realistic mechanics and a responsive interface. Both projects showcase proficiency in JavaScript and enhance user experience with smooth animations and intuitive controls.

React

Led the development of several React-based projects. **Bibliophile — E-commerce** is a robust platform with user authentication and a user-friendly interface, enhancing usability and customer experience. **Facebook Connect** is a social media platform using React and Firebase, featuring real-time messaging, notifications, and secure authentication. Both projects showcase expertise in building scalable web applications and leveraging Firebase for enhanced functionality.
